PRINCE MUTOMB

Software Developer & Data Analyst

Nairobi, Kenya ´• Remote worldwide ´• hello@portfolio3d.test ´• portfolio3d.test

PROFILE

Software developer and data analyst with 7 years building production systems and the analytics layers that make them measurable. I work across Laravel, Python, SQL and modern warehouses, with a focus on reliability, clear metrics and adoption.

EXPERIENCE

Independent Consultant ´• Software & Data ´• 2021 â Present

- Designed multi-tenant API gateways, commerce platforms and identity systems.
- Built dbt/BigQuery and Snowflake models powering executive and operator dashboards.
- Shipped churn, expansion and climate-risk data products used by non-technical teams.
- Led migrations with measurable outcomes: 63% lower latency, 41% checkout lift.

Senior Engineer ´• Northstar Logistics ´• 2019 â 2021

- Owned the fleet event platform and led the API gateway redesign.
- Introduced observability, incident review and queue reliability practices.
- Mentored four engineers and established the internal API design guide.

Data Analyst ´• Terra Analytics ´• 2018 â 2019

- Built the first governed reporting layer and automated weekly client reporting.
- Partnered with planners to turn geospatial data into usable risk narratives.

SELECTED WORK

Orbital API Gateway ´• Signal Revenue Intelligence ´• Helix Commerce Engine
Terra Climate Dashboard ´• Churn Radar ´• PulseOps Observability ´• Retail Funnel 360

SKILLS

Engineering: PHP 8.5, Laravel, Python, TypeScript, Go, Livewire, Alpine.js, Vue
Data: SQL, dbt, PostgreSQL, BigQuery, Snowflake, pandas, scikit-learn, Looker, Power BI
Platform: Docker, AWS, GitHub Actions, Terraform, Redis, ClickHouse, observability

EDUCATION & CERTIFICATIONS

MSc Data Science ´• Carnegie Mellon University Africa ´• 2019 â 2021
BSc Computer Science ´• University of Nairobi ´• 2014 â 2018
AWS Certified Solutions Architect â Professional ´• dbt Analytics Engineering
